Civil Engineering Contractors

Expression of Interest – Site Engineer

A second generation family owned Civil Construction business with a professional standing in the industry enjoying significant growth is seeking a skilful and civil capable post graduate Site Engineer.

This person must bring with them a unique approach, diligence, self-direction and above all an eagerness that is infectious and complements and reflects the business direction.

A passion for developing knowledge and working alongside a site construction team, with the ability to respond to company structure and systems, combined with a thoroughness of knowledge across construction methodologies, best practice, quality and safety is an essential aspect of this position.

Previous experience in a civil on site environment is key. Knowledge working with an Integrated Management System is fundamental. This role is the integral link and technical support to the Project Management Team.

The Site Engineer will not fit the traditional characteristics; this person must be able to match the stamina to work at a fast pace in a dynamic environment, a business that is in a fast growth curve looking to make significant inroads in the industry.

Essential Competencies:

- Strong interpersonal skills
- Verbal and written capability
- Applied protocol when interacting with senior management and clients
- Plan and prioritise workloads to meet changing deadlines
- Respond to IMS requirements
- Conversant with civil construction methodologies
- Numeric plan reading competency

The role offers a highly organised, focused and energetic individual the opportunity to put their know-how into practice in a responsive and professional organisation striving for "Distinction". Adaptability, originality and high energy will be integral to the success of this post.

Please fwd your covering letter and CV to lucinda.bruno@burtoncontractors.com.au
